

Making the Hair Grow and Other Beauty Secrets

By Miss Valeska Suratt

Miss Suratt is Famous as the Self-Made Beauty of the American Stage.

and thoroughly rubbed into the skin until it has disappeared. The cream will not grow hair on the face. Keep cream in an air-tight jar or bottle.

MISS G. T.—I have tried many blood cleansers, but my mixture of sarsaparilla is my old standby. It has a very prompt and thorough effect. Dissolve twelve ounces of granulated sugar in one-half pint of water, and add one ounce of sarsaparilla, and mix the whole together thoroughly. Then add more water to make a pint. Sarsaparilla is a liquid which you can get at the drug store by the ounce. Get it in the original package. Take one or two teaspoonfuls of this mixture three or four times a day, with a little water if desired.

PIEDRA S.—This leaves the skin as beautiful as marble. Every spot, all kinds of freckles and liver spots disappear quickly. I am never without it, and use it on my arms, hands, face, neck and shoulders. I am proud of the result.

Let half a pint of water come almost to a boil. Add two tablespoonfuls of glycerine. Keep stirring while adding one ounce of zinc oxide. It is all dissolved. Then let it cool. If the cream is too thick to pour easily from a bottle, thin it down a little with more hot water. The cream will be white and satiny. Hold a wet, hot towel to the face several times for several minutes. Rub this cream on the entire face. Then wipe off with a soft, dry towel. Then apply again and let it dry on the face. Repeat this again at night. Any good druggist will let you have zinc oxide for about fifty cents.

MRS. S. J.—Hair on the upper lip, between the eyebrows, under the arms, and the "fuzz" on the face which is disgusting to so many women can be removed almost magically. I will not advise you to use anything but the following: It is the only safe depilatory I know of. Get an ounce of salicylic acid solution. This you can get at the drug store for one dollar. Apply it with the finger tips to the superfluous hair, keeping the hair moist with it for 2 or 3 minutes until it has been dissolved. Then wipe off with a damp cloth and wash the skin.

SOPHIA.—This is an absolute eradicator of blackheads. First wash the face with hot water and soap. Then sprinkle some peroxide generously upon a sponge made wet with hot water. Then rub well for a few minutes on the parts of the skin which are affected with blackheads. You should be able to secure the peroxide at any druggist's for fifty cents.

LOST.—You should certainly regain your lost bust development or obtain it if you have never had it. In a half pint of cold water dissolve two ounces of retinol and half a cup of sugar, all well mixed together. For three times a day in a wine-glass of water, after your meals. The retinol will cost you about a dollar at the drug store. Advertisement.

at any drug store. This sweet, fragrant cream dissolves by the heat of the nostrils; penetrates and heals the inflamed, swollen membrane which lines the nose, head and throat; clears the air passages; stops nasal discharge and a feeling of coming sneezing relief comes immediately.

Don't lay awake to-night struggling for breath, with head stuffed; nostrils closed, hawking and blowing, or a cold, with its running nose, foul mucous dripping into the throat, and dry dryness in distressing but truly needless.

Put your faith—just once—in "Ely's Cream Balm" and your cold or catarrh will surely disappear.—Advertisement.

MISS VALESKA SURATT. Valeska Suratt is known as the only woman on the American stage who does not have to use switches, wigs, puffs, turbans, braids, or other artifices in dressing her hair. She gives the reason why.

MAKING hair grow for a long time as great a problem to me as it is today to thousands of women. There were days when thick hair would come out on my head, and I feared baldness would soon result. After long experimenting I came to two inevitable conclusions: the hair must have nourishment to keep it in good condition, when Nature refuses to give it; and the hair-roots must be allowed to breathe—dirt and soap accumulate on the scalp and no soap can remove it. Dandruff results, the hair becomes starved, looks lifeless, begins to fall out.

There is a formula which I use and which is the result of my conclusions. The result has been to my astonishment. The hair needs two things, an antiseptic nourisher, and a shampoo that is not a soap, but a remover of dirt. I will give these two formulas here.

The hair-growing formula: Mix half a pint of alcohol with half a pint of water. To this add one ounce of beta-quinol. Shake thoroughly, and then it will be ready to use. If you prefer, you can use impure bay rum instead of the water and alcohol. The beta-quinol you can get at almost any drug store for no more than fifty cents. This formula should be applied very freely to the scalp after brushing it generously for a few minutes at night. Rub the tonic thoroughly into the scalp with the finger tips. This forces the hair to grow abundantly and stops hair falling out. For the shampoo use sugar, exclusively, which any good druggist should be able to supply you for twenty-five cents. I shampoo the hair regularly once a week.

FENELONE.—You say you are 25 and look like 40. To this add two ounces of wrinkle-formula faithfully and you will soon look like 20. This is no exaggeration. A trial will prove it.

I have never known it to fail. Pour half a pint of hot water in a bowl and place the bowl in a pan of water over a slow fire. To this add two ounces of eptol. Stir until it is dissolved and starts to cream. Then remove from fire and add two tablespoonfuls of glycerine, and continue to stir until it is cold. Eptol may be obtained for no more than fifty cents at any good drug store. This cream should be applied very liberally

Try "Ely's Cream Balm." Get a small jar, any size, just to try it. Apply a little to the nostrils and instantly your clogged nose and stopped-up air passages of the head will open; you will breathe freely; dullness and headache disappear; dry morning! the misery, cold-in-head or catarrhal nose will be gone. End such misery now! Get the small bottle of "Ely's Cream Balm!"

PRICE OF MILK

Owing to the extremely high price of feed we are compelled to ask more money for our milk. We are now paying one-third more for alfalfa and one-half more for corn and bran than we did a year ago, and our cows eat just as much. The scale of wages we pay our employees is steadily rising.

In any other business the retailer simply says "The tariff did it," whether it is a pair of silk stockings or a stable broom, but the Baker and the Dairyman are popularly supposed to sell their wares always at the same price regardless of cost of raw material. The Baker can cut an ounce or two off his loaf and still sell for a nickel, but the Dairyman cannot partly fill his milk bottle or can. Of course he can stick the hose in it, but, regardless of the ethics of the question, we don't as a matter of business.

We Have Been Here for 25 Years

growing as El Paso grew, from a one cow dairy to one thousand cows, producing the best and cleanest milk we know how. As our knowledge and experience broadened we produced better milk until today we stand without a peer in the dairy world.

In view of the above statement of facts we announce the following scale of prices, effective Sunday, October 19:

MILK IN CANS 35 CENTS A GALLON.
MILK IN BOTTLES PINTS 8 CENTS.
QUARTS 15 CENTS.
TABLE CREAM 1-4 PINTS 6 CENTS.
1-2 PINTS 12 CENTS.

On bills paid by the 10th of the following month a discount of 5 percent will be given on can milk and 10 percent on bottle milk.

14 Pint Milk Tickets will be sold for One Dollar to those preferring this method of payment.

El Paso Dairy Co.

MINING NEWS

BISBEE DISTRICT INCREASING OUTPUT

Junction Shaft Is in Excellent Sulphide; New Hoist For Copper Queen.

Bisbee, Ariz., Oct. 15.—Progress in mining in the Warren district the past week has been excellent. New construction and development work has gone steadily along. The Calumet & Arizona during the new smelter construction and breaking in period has been restricted in ore forwarding, but it will shortly increase its output of ore. Shattuck & Arizona will, it is said, about double its output. At the Copper Queen there has been a steady increase in ore shipped and heavier shipments of concentrates from Nacozari. These have entailed the demand for Bisbee ores, but with changes being made at the smelter, it will soon be ready to take up larger shipments from this district.

C. & A. Going Deep. In the Junction shaft of Calumet & Arizona, preparations are being made for the exploration of ground below the 1,500 level. The water has been cleared and the cutting of stations and ore pockets on the 1,500 and the 1,700 levels is underway. This work is in advance of the concreting work that is to be carried from the 1,500 to the 1,800.

Three More Levels by Jan. 1. On the 1,500 level the plan called for the installation of a big pump station. By the first of the year the concreting will be finished and there will be three more levels in readiness for development work, and they will be much the deepest in the district. Junction shaft is on the 1,500 level. The other operating shaft in the district, The Queen's 1,600 level is approximately 250 feet above the 1,500 level of the Junction.

Values Go Down. It is known that in putting the Junction shaft down from the 1,500 level there was encountered some very promising showings in ore. All the way there was mineralization to more or less extent, but between the 1,700 and the 1,800, the findings were particularly pleasing. At the bottom the station was cut in excellent sulphide.

New Copper Queen Hoist. The head frame of the new hoist being erected over the old incline shaft just above the postoffice on Copper Queen hill is going up rapidly. This hoist practically makes a new shaft for the district, for the old incline has long been out of commission.

Leasing Operations. On this same side of the district, the Higgins Leasing company has been developing satisfactorily. It is doing chiefly in the ore found in the stone through the raise from the drift.

ETTA AND MAJESTIC WILL BE REOPENED

Fourteen Claims Included in Transfer; Monarch Planned and Will Resume.

Monte Cristo Sulfate Silver Pure. Prescott, Ariz., Oct. 15.—One of the most important mining deals closed in Yavapai county this year is the transfer of the Etna and Majestic mines in the Cherry Creek district, to the Majestic-Idol Mining company. The Etna group embraces eight claims and the Majestic six.

Leo Von Rosenberg, mining engineer, made three examinations of the groups and recommended that they be taken over. The company has employed him as superintendent. Development work soon will be underway.

Monarch to Resume. Operations will soon be resumed at the property of the Monarch Mining and Smelting company, near Wickenburg, in the southern part of the county. The Consolidated Copper company has bought \$100,000 worth of bonds and will act as trustee during the life of the new agreement, which runs several years.

Ophir Will Be Developed. An extensive campaign of development work has been mapped out by A. J. Kent for his Ophir group, four miles and a half west of Hot Springs Junction. The group comprises nine claims, four of which are on a vein that lies along a big iron-bearing dyke 10 to 20 feet in width.

Good progress is being made in sinking the new shaft at the Monte Cristo sulfate silver mine. The shaft is being used for United States coinage has been taken from the Monte Cristo ore.

Developing Work. The development of an immense mineralized zone on his Sink to Rise group. Four claims have been located along the dike, giving a length of 6,000 feet.

Humboldt Shipping Schedule. The Humboldt Consolidated Mining company is steadily sinking its main shaft and developing the ore body on the 150 foot level. High grade ore is being shipped and the returns more than cover expenses. A carload recently shipped averaged 400 ounces silver to the ton and 1140 ounces ore has been opened in the new south drift.

Eureka Producing Gold-Zinc. At the Eureka claim, in the Walker district, where a shaft was recently made, about 400 tons of ore are piled at the mouth of the tunnel. The ore will mill 240 tons of gold. Zinc is carried in sufficient quantity to be a valuable by-product.

Good Values in Pioneer. At the old Pioneer mine, near Walnut Grove, a winze has opened a streak of ore two feet in width carrying good values in gold and silver.

New Year's Gift Lets Contract. A new tunnel has been completed on the New Year's gift mine, near the Black Mines company and the company has let a contract for the development of its property. The tunnel is already in the mine and will be extended to the heart of the mountain.

Yavapai Resumes Development. Development has been resumed at the property of the Yavapai Mining company, near Humboldt. Internal differences have been adjusted and the company is amply financed.

MAMMOTH MINE TO RUN ON \$40 GOLD ORE

Phoenix, Ariz., Oct. 15.—When the new granite plant at George Young Mammoth mine, 15 miles northeast of Mesa, begins operations it will be on ore running \$40 a ton in gold. This ore comes from the new shaft, where development work is now being carried out.

At a depth of 167 feet in this shaft a drift to the north along the main contact of the vein exposed three feet of 240 ore. Two winzes prove the ore to be in existence along a distance of 140 feet.

The cyanide plant consists of three 60-ton iron leaching tanks, a 100-ton strong solution tank, one 7x5 weak solution tank, one 6x10 sump tank and 12 zinc boxes of the removable type. Ten stamps of the old 20 stamp mill have been put in shape to crush the ore. It has been found that a satisfactory extraction is made by the application of four pounds of cyanide to one ton of ore.

An Empty Room Is No Comfort. Want-advertiser that empty room into an income-earner. Telephone 115 or 116 and a messenger will be sent for your copy. Special want-ad telephone and messenger service Saturday nights until 9 p. m. for the big Sunday Herald. The cost is only 10 cents a word or 60 a week.

CARMICHAEL FINDS HOLE IN MINE LAW

Clifton Manager Wants Arizona Copper Co.'s Assesment Lowered to Fit Bessemer Pig Prices of 1912.

Phoenix, Ariz., Oct. 15.—A hole in the new mine tax law has been brought to the attention of the state tax commission by Norman Carmichael, general manager of the Arizona Copper company, of Clifton. The law makes no distinction between various grades of copper, and unless the Arizona company's assessment is lowered a long legal battle may result.

The law provides that the value of a mine for taxation purposes shall be four times the net output for the preceding year, plus 1 per cent of the gross and the physical value of improvements. It provides that the average price of copper for the preceding year shall be taken from the Mining and Engineering Journal "or similar publication of equal standing." As the Arizona was assessed the same as the United States producing Bessemer pig copper, no publication of any kind gives quotations on that grade of metal.

All mines in Arizona produce electrolytic copper, except those of the Detroit and Arizona Copper companies. The Detroit turns out casting copper and the Arizona, Bessemer pig. Last year the average price of electrolytic was 16.41 cents a pound and for casting 16.16.

As there was no average price quotation on Bessemer pig, the Arizona was assessed the same as though it produced Bessemer pig. General manager Carmichael says that last year the average price of electrolytic was three-tenths of a cent lower than casting, and he wants his company's assessment lowered.

He should be held before the tax commissioners, who hold that they cannot take any cognizance of any grade of copper not mentioned in the Mining and Engineering Journal. They also hold that they have no power to review their own actions when they were either the state or the board of equalization. Attorney General George Purdy Bullard has been asked to pass on both points.

GUANAJUATO MINES ARE NOT BEING MOLESTED.

Guanajuato, Mex., Oct. 15.—Mining operations throughout the state have not suffered on account of revolutionary movements or marauding bands of rebels. There are good prospects that work will be resumed in various mines, that have lain idle for some time, and that new properties will be opened.

During the past week shipments from this camp to the smelters represented a value of approximately \$41,500.

Regular weekly shipments of about 80 tons of ore are being made to local buyers from the Calicito and Anexa mines, owned by Fernando Rubio Rocha and Manuel Aranda, located between Minatitlan and Guadalupe. The ore runs from 150 grams of silver and 15 grams of gold to 250 grams of silver and 25 grams of gold per ton. The properties are being developed by a 2x2 meter tunnel, 450 meters long. Pumps have been installed to underwater three shafts.

FIRST CHRISTIAN CHURCH MEN'S CLUB REORGANIZED

At a meeting of the First Christian church men, held Tuesday evening at the Oregon street church, the Men's club was reorganized with Judge L. A. Dale as president; E. C. Kuickmeyer, vice president; and E. J. Snider, secretary and treasurer. The reorganized club will have a dinner on November 4, when Rev. Hugh McCallan, pastor of the Christian church in San Antonio, will deliver the principal address.

THREE AMERICANS FORM NEW COMPANY

Will Develop Gold-Silver Mine in Altar District, Sonora, Mexico; Show Increase; Will Resume Reverbatory.

Cananea, Son., Mex., Oct. 15.—Three Americans, Chas. L. Dunbar, James Crawford and Richard Monte, have organized the Queen Mining company to develop the Queen gold-silver mine in the Altar district of Sonora. The property is located 53 kilometers west of Cananea and 36 kilometers north-east of Port Lobos. Machinery has been ordered.

A. H. Bachman is shipping 15 percent copper ore to the Cananea smelter from the Cananea Northern property, about five miles north of Cananea, which he is operating on a lease from A. Marti, owner. He has 15 men working and this number may be increased.

The September output of the Cananea company smelter was 6,441,000 gross pounds of blister copper. This includes the Miami output, which was 2,500,000 pounds, and customs ores, 664,000 pounds. The four C's company output shows a gain of 32,166 pounds, the Miami 52,475 pounds, while the customs show a decrease of 84,408 pounds. It is probable that the October output will also show a gain, as both of the reverbatory furnaces will be in operation the entire month. They were partially shut down during September.

Paul Probert has succeeded W. H. Tangey as superintendent of the Calumet & Arizona Cananea Mining company. Tangey will leave immediately for California. The mining operations are in charge of T. McGovern. Sink-ing operations continue and results are encouraging. The shaft is going down in country rock, streaked with mineral. The wet mill is down while the dry mill is cleaning up.

The Agua Buena mine, located near Nacozari, will soon be developed on a large scale, according to J. Jude, the owner, who says that he is prepared to spend \$100,000 on the work.

A strike of native silver on the 200 foot level was recently made at the Ormus mine near Cananea.

A hoisting plant is being installed at the Washington mine near Huachuca. As soon as it is completed development work will be resumed.

Does Your Stomach Trouble You?

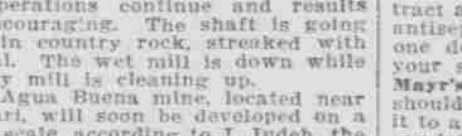

May's Wonderful Stomach Remedy is Successfully Taken in Cases of Stomach, Liver and Bile Disorders. And One Dose Has Often Dispelled Years of Suffering.

Many of the most chronic cases of Stomach Trouble have spread its fame far and wide, and it gives it to the other. No matter where you live—you will find people who have suffered with Stomach, Liver and Intestinal ailments, etc., and have been restored to health and are loud in their praise of this remedy. There is not a day but that one hears of the wonderful results obtained from this remedy and the benefits are entirely natural, as it acts on the source and foundation of these ailments, removing the poisonous catarrh and bile accretions, taking out the inflammation from the intestinal tract and assists in rendering the same antiseptic. Sufferers are urged to try one dose—whose alone should relieve your suffering and convince you that May's Wonderful Stomach Remedy should restore you to good health. Put it to a test today—the results will be a revelation to you and you will rejoice over your quick recovery and once again know the joys of living. Send for booklet on Stomach Ailments to Geo. H. May, Mfg. Chemist, 156 Whiting St., Chicago; or better still, obtain a bottle from your druggist, Kelly & Pollard.—Advertisement.
